

WiFi Remote Access Available with CCI Machines Now!

CCI has already updated all our computer-controlled machines to support web-based wireless remote access (except for SS600). It allows remote CCI service staff or your technician to get immediate access to your machine and carry out maintenance, inspection, setting, and upgrade of software from anywhere in the world. Users can reduce downtimes and costs associated with site visits to a minimum. This is obviously important when dealing with urgent order request as any delay could lead to unsatisfied customers. The update also eliminates the previous hassle of installing wired Ethernet network. For user convenience, we have both WiFi and Ethernet connections included in our machines. Reach us at info@ccitk.com for more details about this new feature.

Triple Beam Designed for Weaving Industrial Fabrics

Due to properties of fabric weave, when different types of warp yarn are woven into fabric they are subject to considerable tension on warp beam. This will lead to yarn breakage during weaving operation. To make manufacturing more efficient, the warp beam must be divided into two or more to keep consistent yarn tension on the same beam. CCI presents triple beam for multi-tension warps especially for production of industrial fabrics which usually use several types of yarn for reinforcement purpose. It is an ideal solution to handle three sets of warp separately. The triple beam includes one standard warp beam and two add-on beams which can be effortlessly attached to our sampling loom, Evergreen. Both triple beam and double beam are all available now from CCI, and there is possibility for solution of more beams upon request.

Note: The multiple beams assembly requires warping machine which is capable of handling longer warping length.

Join CCI at ITMA ASIA + CITME 2018

CCI will be showcasing at ITMA ASIA + CITME 2018 in Shanghai from 15 to 19 Oct, 2018. At our booth, we will be highlighting **expanded dimension solution** that has been engineered to simplify the entire user experience for fabric sampling and small quantity production. It's capable of making wider width of 900 mm which is ideal for producing sample of final products like shirt or bath towel. The solution includes **Evergreen 900** (automatic sampling loom), **Mini Lutan 900** (single-end warping machine), and **Taroko** (Multi-spindle Sizing Machine). We are looking forward to seeing you at stand no. C08, Hall 3.

World Festival in 2018

La Tomatina 2018 (29 Aug, 2018)

La Tomatina attracts thousands of people from around the world into this world's biggest tomato fight that is held on the last Wednesday of August every year in the village of Bunol, Spain. Crowds of people will gather to throw tomatoes at each other in the fiesta, and tomato pulp will soon covers people and the street on that day. Wanna join these revelers!? Remember to get a ticket for entering this chaotic event!

Upcoming Events
