You Can Finish Sample Even within One Day – Evergreen II

CCI's well-known sampling loom, Evergreen II, now is launching its new animation video. The animation presents the advantages that the machine can bring to everyone in a simple way. With the machine, you can easily and quickly finish sample within even one day. You don't need to worry about losing order to your competitors because Evergreen II helps you getting more orders ! Check it out at <https://youtu.be/xU5XsOpSrpk> and share it with your partners, customers, friends, and everyone you know now!

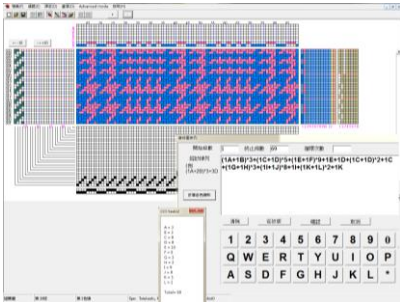

We Have Been Awarded

CCI is very proud to announce that we have been awarded the "23rd Rising Star Award", held by Ministry of Economic Affairs (MOEA) in Taiwan. The national award selects the superior domestic SMEs with brilliant performance on operation, export, and social responsibility to have high competitiveness in the international market. CCI has been recognized especially for its innovative technology & product as well as management quality.

In addition, we would like to take this opportunity to thank all our customers and team members who made this possible! With all your support, CCI will continue to focus on innovative research across different applications in textile area.

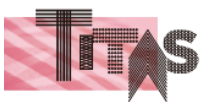

SEdit Pro Released Soon

To thank you for your support over these years, CCI is going to release the free textile software, the “SEdit Pro” for download on our official website soon. Compared with the previous version of SEdit standard, this comprehensive software involves many functions. The SEdit standard can only input the information required for conducting loom, while this upgraded version allows users to do weave design and then further generates the information automatically. Even the drawing-in plan... etc. could be completed in “SEdit Pro”. It is very convenient and easy to use.

The “SEdit Pro” is very helpful for educational and research institutes and textile factories. So be sure to stay tuned!
