

Stand Out with Affordable Solution for Small Order - Mini Lutan 1700

CCI presents a new animated video of the single-end warping machine, the Mini Lutan 1700. Through this video, you can learn more about the advantages of the machine. It is capable of handling extended dimension and producing up to 50 meters short-run warp beam, which means

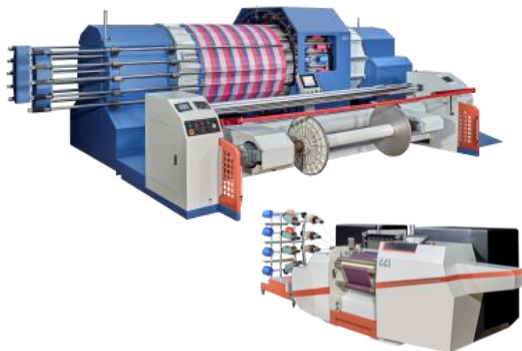

that the full width warp beam produced by the Mini Lutan 1700 can be used directly on the full width production loom. It will no longer be a dream to use your existing loom to produce small batch orders or make samples. There is no doubt that you can get efficient work at an affordable price. Check it out now! <https://youtu.be/mnKYNmyj6OY>

Exhibitions Rescheduled Because of COVID-19

Due to the size of the spreading COVID-19, several exhibitions in which we participate are postponed to 2021. The new dates will be announced as soon as possible. Please remember to reserve your time and come to join us next year.

Although the pandemic has severely affected the global economy and people health, we believe that as long as we all work together, we will definitely weather this storm! Taiwan's reaction to COVID-19 has been fast and effective. We have successfully contained the spread while maintaining social stability here. Thus CCI is still operating as usual and at your service anytime. Once the limitation on traveling is open, we can meet again.

Before that, please be sure to take good care of yourself and your family. Let's get through this together!

Development Progress in Kebalan & LUTAN.com

Currently we are working hard to complete the development of Kebalan and LUTAN.com, despite the fact that the pandemic has caused temporary chaos in the world. And we are having a smooth progress in the machines. The final versions will be available and republished onto our website soon in 2020.

Holiday Schedule

Dragon Boat Festival: 25 ~ 26 Jun
