Tailor-made Warp Creel without Twisting Yarn

CCI has developed a warp creel based on customers' needs, offering a tailor-made solution that eliminates the need for a traditional warping machine. The creel is suitable for handling warp yarns with low density and processing them without twisting. This setup enables direct warping and feeding of the warp yarns into Evergreen II (sampling loom) for weaving operations. We successfully completed and shipped this solution to a customer in Switzerland by the end of year 2024.

Launching Soon

Our brand-new Intelligent Drawing-in Machine that boosts efficiency and makes setup a breeze! Even beginners with little to no experience can get started right away. With its user-friendly design, **DrawWiz** helps you create samples faster and easier than ever before. Scheduled for launch soon within this year.

We Make Life Easier... We Make Life Easier... We Make Life Easier...

The Servo Loom - **Kebalan** - is gearing for an exciting re-launch! This upgraded model offers three interchangeable shedding mechanism options: Servo Motor, (Electronic) Dobby, and Tappet. CCI is ready to provide the solution based on your budget and production needs. Stay tuned - Kebalan is coming back more advanced than ever!

Selvage Tuck-in Device Available

Our sampling loom now comes equipped with a selvage tuck-in device, making our solution even more flexible! This device is pneumatically operated, offering smooth and efficient edge handling to enhance your fabric quality.

Notification of Service Termination

Maintenance will no longer be provided for machines installed before Jul. 1. 2009.

Weaving machine: SL7900, SL8100, SL8900 series

Sizing machine: SS560, SS565

Warping machine: SW550, LUTAN v3.6, LUTAN v5.0

This notification of service termination is effective from Jul. 1. 2025. In addition, we would like to recommend that you consider buying one of our new models to replace those models. For more information, please visit our website at <http://www.ccitk.com/> or email info@ccitk.com.
