

Successful Participation in the India ITME 2016

It's been twelve years since our first presence at the show in India in 2004 which gave us a fulfilling week with great results. Up to now, we have successfully reached around 70 nationwide installations in this one of our most important markets. This year, over the six days of the exhibition, CCI witnessed the presence of more than a thousand quality visitors from various sectors & segments of the industry, such as weaving factory, educational and research institute, material supplier, etc. We really enjoyed the many inspiring conversations and were impressed at the number of visitors who are interested in our solutions. It's always a pleasure to see familiar faces, and meet new people in our industry!

We also had the opportunity to enjoy exploring food, culture and traditions of India, and deeply felt the warmth & hospitality of people everywhere, like restaurant, exhibition venue, hotel, etc. We really had a very pleasant time during the show!

CCI in India ITME 2016

The Studio - Sampling Loom

We had the chance to feature the latest solution for small-scale application which focuses on sample and small quantity production. Among a total of four types of live demonstrations CCI showed how these innovative machines can be utilized and combined to your current factory facility or studio to enable the exceptional energy & cost efficiency for your weaving application.

Evergreen - Sampling Loom

Lutan - Single-end Warping Machine

Taroko - Multi-spindle Sizing Machine

CCI appreciates your continued support throughout these years. It's always a great pleasure to work with you and we are waiting to be in touch soon again in 2017. Please visit our website at <http://www.ccitk.com> for more information.
