

We Make Life Easier...

We Make Life Easier...

The weaving and textiles industry nowadays remains a crucial role in many sectors like fashion, sports, upholstery, academic & research, consumer electronics, industrial, medical, and safety applications... However, the industry is not always able to keep up with the constant evolution of the technology and still has limited capacity in terms of innovation. Now is the time to rethink how this traditional industry can change its way of working, and change the way you usually do!

CCI believes the base of any kind of textile product is – SAMPLING. Everything that gets done in the industry starts with it. It is an art that has a profound impact on product development. Whether it's for new product idea or approval of order, sampling is a very important step to verify design and function in actual textile at an early development stage like design and test phase. It is not just making a sample, it is the fundamental of the industry. Without sampling, there is no imagination, creativity, and new inventions. However, most people ignore the importance of sampling and that using an efficient method is capable of offering many advantages in product development. By adopting an ideal method, you can create various kinds of new product effectively, gain product differentiation advantages, accelerate time to market, stay ahead of market trends, and furthermore - Make Your Life Easier, which is also CCI's vision for the future of the weaving and textiles industry!

EVERYTHING STARTS WITH SAMPLING

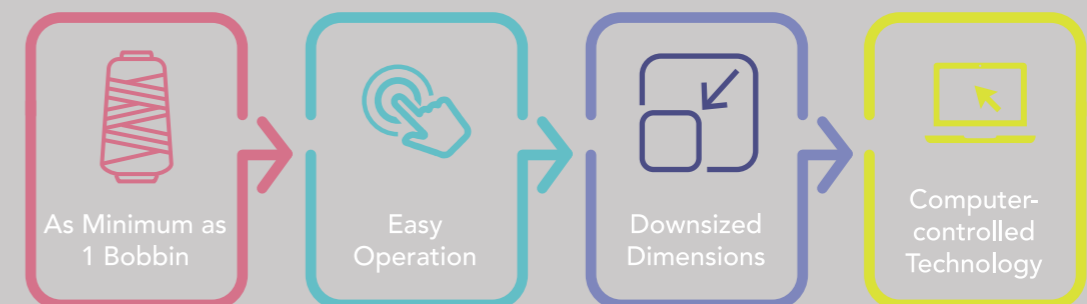

Yes, CCI has seen the future! We have built a wide range of innovative solutions that will change how people make a fabric sample, economically and environmentally. Whether it is fabric design & verification, sample production, new material & product development or small quantity order, CCI aims to deliver efficient and cost-effective solutions to suit all your weaving requirements! We endeavor to perform a comprehensive change of conventional way and hope that there are no more wasted resources and waiting time, only benefits of simple operation and money saving delivered to users.

INNOVATIVE SAMPLING METHOD

CCI's solutions ranging from sizing, warping to weaving process are designed with 'as minimum as 1 bobbin' concept for waste free and easy operation. Our machines are more compact than traditional production facility. Other eye-catching features include user-friendly interface, specially developed software, easy-to-use touch panel, computer-controlled technology and more.

BENEFITS OF CCI SAMPLING SOLUTION

A NEW DIMENSION TO SAMPLING

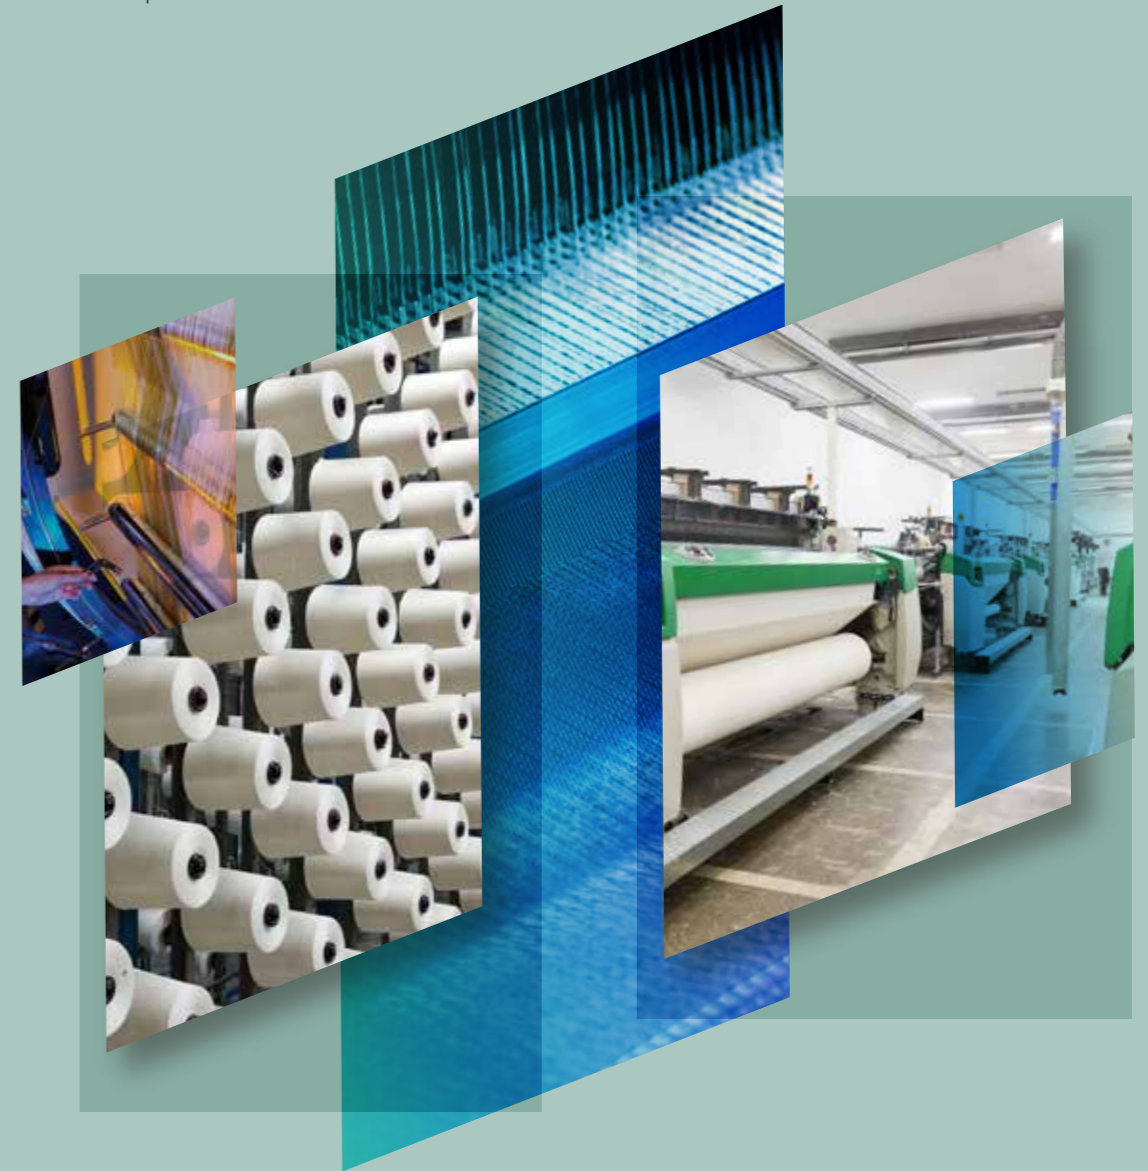

IN THE STUDIO

CCI's IN THE STUDIO solution includes three main processes of sizing, warping and weaving for sampling. Whether you are a weaving factory, academic & research institution, design house, sampling workshop, functional & technical fabric industries, broker & trader, yarn manufacturer, among others, our solution helps manage your approval of orders, new product development, or market research. It is specifically suitable for working in small-scale applications. Your office can be a small factory, design center or both to increase your business efficiency and R&D capability at lowest operation cost.

ON THE LOOM

CCI's ON THE LOOM solution focuses on preparation process of sizing and warping. The solution enables user like weaving factory who already owns production machines to efficiently produce short run beam in full width for sample and small quantity orders. They can operate in a more economical and waste-free way to handle customer's demand for diversified range of products with fast turnover. The solution is also well-suited for educational and research institutes to help train the next generation of experts and further foster research.

COMPANY PROFILE

Where we go

Aim to Contribute to the Weaving Industry

A Leading Brand

Committed to Sampling Solution

Energetic & Dynamic

Innovative

Dominant in Various Markets

Reliable Services & Supports

User-friendly Solution

R&D Oriented

Who we are

What we have

CCI is a leading brand and the only one that is fully committed to sampling solutions for varied weaving application. We change the conventional way that people used to know about fabric sampling which usually spends a lot of time at higher cost on mass production line. We also work closely with our partners to help offer complete solutions for a variety of industries. Our brand new dimension to sampling brings the woven fabric production to next level as you're backed by a global leader!
